ON THE ROAD**

/ LOAD MASTER

---

# A RELIABLE PARTNER FOR SPECIAL LOADING

A new line of Load Master trailers and semi-trailers, used to transport machines and equipment with oversized dimensions. Low-floor vehicles are produced with three and four axles as well as a fixed or sliding frame. The vehicle family is complemented with low-floor trailers with a turntable.

# WELCOME TO THE WORLD OF **WIELTON**

**The Wielton Group is one of the three largest producers of semi-trailers, trailers and vehicles bodies in Europe and is among the ten largest producers in the industry and in the world.**

Wielton's mission is to create and deliver the best transport solutions for business. We always base our activities on reliable values, including: people, initiative, quality and security.

Our clients involve mainly transport, construction, production, distribution and agricultural companies seeking bespoke solutions to their operational requirements.

## STRONG ARGUMENTS

- + excellent traction properties
- + durable construction made of high-grade S700 steel
- + bespoke configurations
- + functionality and aesthetics of performance
- + workspace according to ISO1726: 2003 standards

## Investor Benefits Package Always Move Forward

**We actively work so that your company will gain an advantage over the competition, through a well-organized and equipped transport fleet.**

Each design is unique and specific to the clients' operational requirements. Wielton low-floor vehicles are built to be universally applied. New construction solutions ensure its durability in long-term operation, while maintaining a relatively low own weight, excellent traction and utility properties of the vehicles.

### **Benefits for clients:**

- + **low own weight is an option of heavier loading and lower fuel consumption,**
- + **a product that meets all requirements of safety standards,**
- + **universal product for transport of different types of cargo,**
- + **short loading and unloading time.**

- + **bespoke configuration**
- + **high quality guaranteed**
- + **attractive forms of financing**

Please contact our sales department. We are always here for you.

# MULTI-PURPOSE VEHICLE FOR SPECIAL TASKS

LOAD MASTER low-floor semi-trailers were designed in response to the needs of clients who transport a wide variety of loads, with different weights and dimensions. These semi-trailers are distinguished by the customisability of the design which, allows for configurations with various types of ramps, depending on the clients' needs. Taking their standard equipment into consideration, they can also work with two- and three-axle tractors.

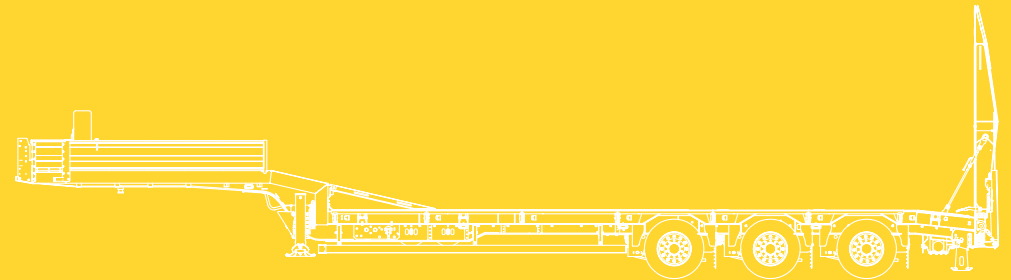

---

# LOAD MASTER TECHNOLOGICAL SOLUTIONS AND MODEL CONFIGURATIONS

The **LOAD MASTER** line involves semi-trailers and trailers used in the transport of construction, mining and agricultural machines, construction elements as well as and size loading.

## PARAMETERS:

- + frame made of high-strength S700/S355J2 steel,
- + low weight,
- + lower fuel consumption,
- + modern design and aesthetic appearance.

# Low-floor non-sliding NJ3M2 semi-trailer

**LOAD MASTER** semi-trailers with non-sliding frame (NJ3M2 / NJ4M2) are characterized by their low own weight from 8.4 t depending on the equipment version, and the DMC construction is 48 t. The outer length is 13.4 m.

Two-leg support legs with smooth adjustment of the height.

Strengthened tires.

The first axis is lifted automatically, the third one is turning.

Cavity on the excavator's arm.

## Low-floor non-sliding NJ4M2 semi-trailer

NJ4M2 are characterized by their low ownweight from 9.1 t depending from the equipment version and the DMC construction is 58 t. The third and the fourth axis is self-turning.

Steel or wooden filling of the cavity.

Electric winch with high pulling parameters.

Front of the semi-trailer.

Balcony installation system with a toolbox.

Numerous fixation grips of cargo in the range of 2.5 t -10 t.

## Low-floor sliding NJ3RM semi-trailer

In the case of NJ3RM2 sliding frames, the own vehicle weight starts from 11.3 t and the construction DMC is 48 t. 6 ramp configurations are available throughout the **Load Master** line.

Control panel.

Ramps to the balcony.

Possibility of extending the platform by 4 m. Mobile platform, 1 m wide.

The system of opening and closing the ramps.

## Low-floor sliding NJ4RM2 semi-trailer

In the case of NJ4RM2 sliding frames, the vehicles own weight starts from 11.3 t and the DMC construction is 58 t.

The third and the fourth axis is self-turning.

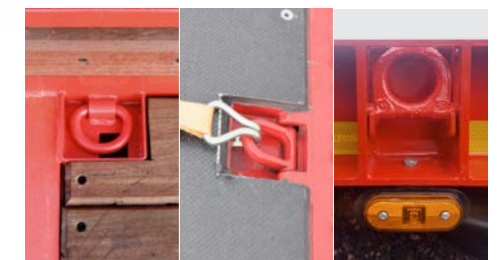

Electric winch with high pulling parameters.

Balcony installation system with a toolbox.

Fixing the wheel and extension elements.

Numerous fixation grips of cargo in the range of 2.5 t -10 t.

## Low-floor PS3B trailer

In the case of PS3B trailers,  
the vehicles own weight starts  
from 5.9 t, and the DMC  
construction is 30 t.

The drawbar height can be adjusted.

Toolbox.

Mechanical suspension option with BPW axles.

Posts on the edges 8 pcs. (3 axles) and 10 pcs. (4 axles).

## Low-floor PS4B trailer

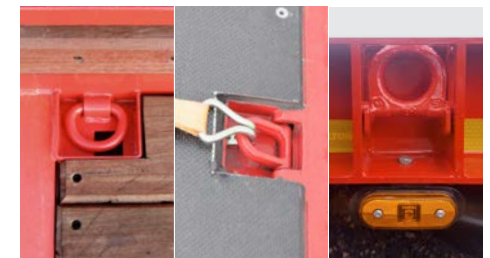

In the case of PS4B trailers, the vehicles own weight starts from 7.5 t, and the DMC construction is 40 t.

Warning lamp.

Fixing the extension elements.

A wide range of drawbar types.

Numerous fixation grips of cargo in the range of 2.5 t -10 t.

# Safety and comfort of use

**Load Master semi-trailers are universal  
and multi-purpose vehicles.**

Control has never been so easy, we can choose between manual or remote panels controlled with a remote control.

Before the product is marketed, it is tested and controlled.

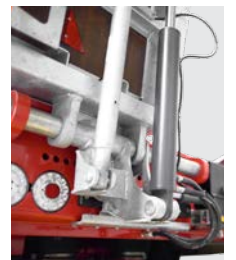

Now you can transport more for less, thanks to the optimum own weight.

A positive result in the tests allows the product for sale.

A wide range of ramps will facilitate loading.

The floor is made of hardwood with a thickness of 50 mm.

Two mobile platforms.

Widening the floor.

Rear supporting leg.

Broken ramp with hydraulic control.

Wide broken ramp filled with a grate.

Single ramp.

Single ramp hydraulically controlled.

Full Interior LED Lighting.

## Configuration is the key to success

Similarly to other products of the Wielton brand, low-floor **LOAD MASTER** semi-trailers can be adjusted to the individual needs of clients, using many configuration options and accessories with additional elements. They are also made of components from leading manufacturers on the market, which ensure trouble-free operation even in difficult conditions.

The standard equipment elements of **LOAD MASTER** trailers involves the cavities on the excavator frame (with the possibility of covering it), ramps on the balcony, aluminum sides of the balcony with a toolbox and the platform expanding system. In addition, it is possible to equip the vehicle with an electric winch with a pulling capacity of 9072 kg.

The floor of **LOAD MASTER** trailer is made of hardwood and the lighting utilizes LED technology. In addition, you have the option of configuring ramps (single or broken) with different types of filling and with the option of manual or hydraulic control.

## WIELTON SERVICE

Always at your service 24/7

**Wielton trucks are safe and reliable. However, like any technologically advanced equipment, they require professional expertise to service and maintain. We provide our clients with professional support, technical services and a wide range of services related to the use of the vehicles and their repairs, both at home and abroad. Our offer includes specialized technical facilities and professional crew.**

The service includes ongoing mechanical repairs, painting, sheet metal repair, tarpaulin repair, reconstruction and providing additional equipment, suspension and brake systems repair, replacement of parts, wheel geometry, frame measurements, electrical, pneumatic and hydraulic systems repairs, as well as periodic technical tests and inspections.

Repairs in the factory service are guaranteed to be of the same quality as new products.

### Services for clients:

- + **mobile service - service vehicle,**
- + **fast and professional factory service,**
- + **service training,**
- + **authorized partner network of service points in the country and abroad.**

Thanks to the Wielton Assistance service, we provide support for guaranteed repairs on the road.
